

Rubber Tuff Mulch

TOT TURF®

A PLAYCORE Company

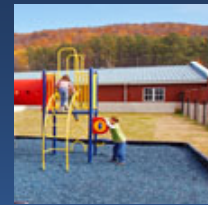

Tot Turf Tuff Mulch: *Resilient, colorful, loose fill option with great fall attenuation properties*

Tuff Mulch provides a colorful, long lasting option for loose fill surfacing. Because it is made of recycled rubber, it provides an excellent, springy surface for fall attenuation. As a loose fill surface, it will require some additional maintenance to rake it back into place, but will not require decomposition top offs.

Tuff Mulch is available in six natural colors, and is comprised of a mixture of crumb rubber and rubber buffings to help aid in compaction. It provides a natural and attractive look for the play area, and can also be used in landscaping applications to help plant roots retain moisture. It is not a good option for play areas where accessibility for mobility devices is a consideration.

We recommend geotextile barrier fabric, drainage systems, and wear mats as part of a complete Tuff Mulch system. Containment curbs are required to maintain depth and prevent the surfacing from migrating to non-play areas.

Basics at a glance

Ideal for: Landscaping applications, areas where mobility device access is not required

Price: Mid range

Materials: 100% cleaned recycled rubber

Colors: Six

Warranty: 10 Year color warranty

Maintenance: High

Meets: ASTM F1292, ASTM F1487
